

How To Start A Electric Quad Bike

Ensure the gear-switch is set to Neutral (9 o'clock), and that a fuse has been placed in the fuse-holder, then you simply need to insert the key into the ignition barrel, and turn the key. To drive forwards set the gear-switch to Drive (12 o'clock), and to drive in reverse set the gear-switch to Reverse (6 o'clock).

How To Restrict The Quad Bike Speed

To limit the speed on a electric quad bike, please locate the speed-limiter above the motor, with the supplied keys the maximum speed can be set. To avoid lose or damage ensure to remove the keys after adjusting the speed.
